Engineering Education

Volume 66, 1975-76

The page numbers in this index refer to the eight issues of *Engineering Education* for 1975-76.

1-128	October	365-442	February
129-208	November	443-698	March
209-286	December	699-782	April
287-364	January	783-860	May

Note: The March issue, devoted to Engineering Research and Graduate Study, contains its own detailed index.

In this index, **boldface** type indicates subject headings; *italics* indicate authors; and titles of articles and departments appear in regular type. Page numbers are explained above.

A

A is an A is an A, Or Is It, An?, 232
academic standards, 160, 232
Academic Standards and Grades, 160
accreditation, 175
admission selection research, 268
Aids for Educators, 207, 284, 362, 441, 781, 854
Aldana-Valdes, Eduardo, 824
Alden, John, 46, 749
Aldridge, Bill G., 810
Anatomy of a Successful Project, The, 714
Andrews, Deborah C., 169
Annals of Engineering Education, 226; statement of purpose, 227
Are Engineering and Guidance Interrelated?, 222
Are We Doin' All Right?, 293
Are We Really Moving Toward Professional Schools of Engineering?, 771
Arnold, Henry A., 828
ASEE activities: about the Society, 15; annual conference (1976), 308, 382, 718, 798; annual conference abstracts (1975), 35; institutional members, 101; nominations, 273; President's message, 11, 135, 211, 293, 370, 448, 704, 787; Review of the Year, 21; Society organization, 62; Society records, 93; World Congress, 818
ASEE Information Network, The, 211
Australian Approach to a Familiar Problem, The, 437

B

Baccalaureate Programs in Engineering Technology, 179
Baluch, Mohammed H., 435
Bammi, Deepak, 843
Beedle, Fritz, 824
Bandler, Donald L., 771
Benefits of Professional Experience for Engineering Faculty, 427
Bennett, James A., 261
Black, William Z., 841
Boland, J.S., III, 389
Book reviews: *Brunel and His World*, 777; *The Existential Pleasures of Engineering*, 851; *Graduate School Adjustments to the "New Depression" in Higher Education*, 852
Bourgault, R.E., 333
Bradley, Francis X., Jr., 146, 216, 296, 378, 714, 791
Brainard, Alan J., 412
British Engineer: No Longer Muddling Through?, The, 832
Burnet, George, 175

C

Cadet Engineering: Five Years of an Experimental Program, 433
Career Guidance, 145, 222, 304, 716, 792
Case for a Dual Absolute and Relative Numerical Grading System, The, 770
Case History Reviews, 206, 282, 360, 440, 776, 856
Cassaro, Michael A., 346
Castino, Anthony P., 399
CEU Comes of Age, The, 147
CEU: An Objective Appraisal, The, 152
Chinese Engineering Education: A Return Visit, 351
Chye, Chua Peng, 820
Cleaver, Thomas G., 323
Cloud, Gary L., 837
Clum, James A., 806
computer-based lessons, 261
Controlled Study of the Semi-Paced Teaching Method, A, 323
Cook, Desmond L., 766
curriculum, 810

D

Deane, Richard H., 800
decision-making, 418
Defore, Jesse J., 142, 220, 300
degrees: engineering and technology, 1974-75, 749; technology, B.E.T., 179; M.S., 355; M.B.A., 310
Derrick, L.R., 341
design of educational systems, 841
Developing Programming Skills in Mechanics: Some Examples, 346
Devens, W. George, 201
Devgan, Satinderpaul S., 435
Digital Dynamic Simulation for All Engineering Undergraduates, 193
Doig, I.D., 238
Dorf, Richard, 850
Donaher, W.A., 328

Down, Kenneth S., 762
Do You Know Your Students?, 764
Dwon, Larry, 355
dynamic system simulation, 193

E
Educational Engineering: A Multidisciplinary Package, 841
educational systems design, 841
Effective Teaching, 389
Effectiveness of the Personalized System of Instruction, 228
Eisenberg, Martin A., 255
Encouraging Logical Thinking in Selected Pre-Engineering Students, 740
Enell, John W., 147
Engel, J.H., 843
Engineering and Technology Degrees, 1974-75, 749
Engineering and Technology Enrollment, Fall 1974, 46
Engineering College Research and Graduate Study: A Ten-Year Statistical Analysis, 452
Engineers Aren't Technicians, Either, 202
English, J. Morley, 829
enrollments, fall 1974, 46
Environmental Impact Chain, The 343
Equal Employment Opportunity And Engineering Education, 800
External Examiners: Separating Teaching from Grading, 344

F
Fabrycky, W.J., 452
faculty: employment policies, 800; qualifications, 812
failure analysis, 326, 332, 334
Fey, Willard R., 841
First Step Toward Improved Teaching, A, 394
First Year of the Rest of the Future, The, 11
Flammer, Gordon H., 196
Flexible Faculty Formula: Tenure Plus Contract, 201
foreign students, 830
Foster, Robert J., 724
Fowler, W.T., 754
Frederick, Dean K., 193
freshmen: logical thinking of, 740; mathematical competence of, 754, modeling, 843; retention of, 724
Freund, C.J., 418
Fuller, O. Maynard, 402

G
Goodwin, William M., 247
grading and academic standards, 160, 232
grading system: dual absolute and relative numerical, 770; external examiners, 344
graduate study, 452
Granger, James R., 766
Gravander, Jerry, 314
Green, Madeleine, 157
Grum, A.F., 760

H
Hager, W.R., 756
Hale, D.R.E., 760
Harrisberger, Lee, 11, 135, 211, 293, 370, 448, 704, 787
Hart, E. Franklin, 812
Hayes, E.J., 337
Henniker: A Challenge for Change, 716
Hill, J.R., 337
History as a Motivational Tool in Undergraduate Mechanics Courses, 425
History Instruction in a Technical Setting, 319
Hoberock, L.L., 165
Hoelscher, H.E., 828
Hoffman, T.W., 238
How to Educate the Professional Agent of Change?, 203
Howard Scott: Where Are You Now?, 215
humanities: and social sciences, 142; English studies, writing, 169; history, 319, 425; in Australia, 437
Humanities and Social Sciences in the Technology Curriculum, 142

I
Iconoclastic Giant in an Age of Progress, An, 777
Ideas in Practice, 193, 341, 425, 754, 837
Illusion of Simple Solutions, The, 139
Improve Your Teaching Tomorrow with Teaching-Learning Psychology, 390
Improving the Retention of Minority Engineering Students, 737
Incremental Utility of Teaching, The, 415
individualized instruction: personalized system, 165, 228; programmed, 244, 255; self-paced, 196, 255, 405; semi-paced, 255, 303
industrial engineering for freshmen, 843
industry: cooperation, 300; instruction, 157; interaction with academia, 794; needs, 766; special courses for, 815
Ingersoll, Alfred C., 152, 851
Institutional Cooperation: A Need in Technology Education, 300
Interactive Computer Based Lessons for Engineering Education, 261
Interdisciplinarity and Team Teaching, 247
Interdisciplinary Courses: Impact, Structure and Funding, 314
interdisciplinary studies, 247, 314, 319, 425, 841
Interpersonal Dimensions of Teaching, The, 184
Introducing Freshmen to Industrial Engineering Through Modeling, 843
Investing in the Academic Future, 220
Is the Typical Engineering Freshman Ready for Engineering?, 754

J
Johnson, Cecil G., 841
Jong, I.C., 754

K
Kavanagh, Thomas, 829
Kemp, Emory L., 777
Kennedy, W.J., Jr., 341
Kirmser, Philip G., 852
Koen, B.V., 165
Kuhlmann-Wilsdorf, Doris, 160
Kulik, Chen-Lin C., 228
Kulik, James A., 228
Kurtz, Donald V., 203

L
laboratory tests, 758
Ladd-Lipset Survey of the American Professoriate, The, 277
Lamb, J.P., 165
Landis, Raymond B., 737
Larsen, William L., 334
Laserna P., Mario, 826
lasers in engineering education, 837
learning theory, 390, 394, 399, 402, 405, 408, 740, 729
LeBold, William K., 247
lecture method: 196, 228, 244, 247, 255, 289, 323, 399
Leuba, Richard J., 196
liability, product, 326
logical thinking in students, 740
Loper, Carl R., Jr., 806

M

Mackson, C.J., 830
Manfra, Jo Ann, 319
management instruction, 766
manpower policy, 222
Marlowe, Donald E., 139, 215, 294, 374, 713, 788
Marsicano, Arthur J., 268
materials: 326, 332, 334, 806
mathematics: competence of freshmen, 754; modeling for freshmen, 843
McCaulley, Mary H., 729
McFarland, David E., 764
McKinnon, Joe W., 740
mechanics, introductory, 255
Mellen, Walter Roy, 770
minorities: equal opportunity for, 800; preparation for eng., 740; participation, 296; retention of, 747; role models for blacks, 337
Minority Enrollment: Averting the 'Formula for Tragedy', 435
modeling, 843
Modular Instruction System for Introductory Courses in Engineering Mechanics, A, 255
Moll, Richard A., 326
Monitoring Student Laboratory Progress With 35-mm Slide Tests, 758
Moon, I.D., 452
Moore, Joseph H., 179
Morgan, Daryle W., 758
Motivating Students in a Modified Self-Paced Design Course, 405
M.S. Degrees for Engineering Technology Graduates: An Identity Crisis Squared, 355
multi-disciplinary program, 841

N

Necessary Business of Budgets and Dues, The, 374
Needed: A Contemporary Engineering Curriculum, 850
Newtonian Monster, A, 826
non-collegiate study, 157
Not Just Frosting on the Cake, 216

O

O'Hara, James S., 812
Olga Korbut or Cathy Rigby: OR Applied to Gymnastics Competition, 760
OK, So How Do We Teach It?, 399
Ong, John, 203
operations research, 760

P

Pastore, Jose, 824
Paz, Mario, 346
Perkins, Jeff, 845
Personalized System of Instruction, 165
personalized system of instruction, 165, 228
Plants, H.L., 244
pollution, 343, 820
Prediction of Academic Success in Engineering Technology, 268
Preparing Effective Slides for Classroom Use, 412
President's Message, 11, 135, 211, 293, 370, 448, 704, 787
Problem-Solving Approach to Teaching a Survey Course, A, 845
problem solving skills, 238, 418, 845
Product Liability: A Look at the Law, 326
Professional? What's That?, A, 704
professionalism: educating agent of change, 203; experience for faculty, 427; schools of engineering, 704, 771
Programmed Instruction vs. Conventional Instruction, 244
programming skills in mechanics, 346
Project Management Instruction: Catching Up to Industry Needs, 766
Project on Noncollegiate Sponsored Instruction, The, 157
Projects & Federal Relations, 146, 216, 296, 378, 714, 791
Projects Board Revisited, The, 378

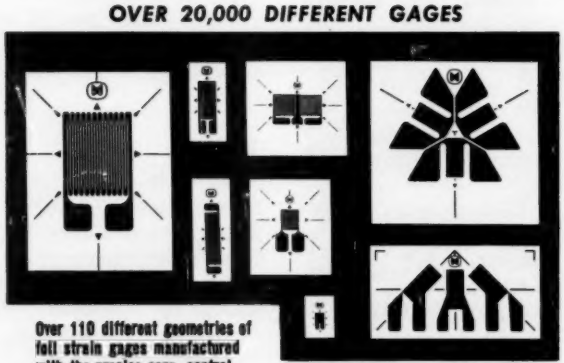
The Proof of Superiority is in the Use of Magnaflux-Made Strain Gages

OVER 20,000 DIFFERENT GAGES



Over 110 different geometries of foil strain gages manufactured with the precise care, control and consistent quality that earmark all Magnaflux products.

- Six Heat Treats
- Variety of Gage Backings
- Encapsulation; solder dots; solder dots and encapsulation; integral terminals; leads; leads and encapsulation.
- 60 through 1000 Ohm Resistance
- Foil Karma/Constantan, Iso-Elastic, Evanohm, Nickel
- Elongation up to 15%
- −454° to +600° F Temperature Range
- Meet ASTME—E251-67 and NAS-942 Standards, where applicable.

For catalog and complete information on Magnaflux made gages and instruments, contact your Magnaflux Field Engineer, or write:
